

Invitation to Community Open House

Notice of Construction Start: PUC (Transmission) LP 230 kV Transmission Project

May 8, 2026

PUC (Transmission) LP is advancing plans to begin the second phase of construction of a new 230 kV transmission line and station. The project will deliver power from Hydro One's Third Line Station, located in Sault Ste. Marie's north end, to a new PUC transformer station in the west end.

As the first phase of construction nears completion (installation of access roads and culverts along PUC easements, station site prep), the next phase is set to begin. As groundwork continues to progress at the transmission station site, work on the transmission towers is scheduled to begin in early June. The preliminary phase of construction includes installation of pole foundations. Pole erection is scheduled for later this year into next.

S.&T. Electrical Contractors Limited, a Division of The Team Group, has been selected to complete construction of the line and station.

A Community Open House hosted by PUC (Transmission) LP and S.&T. Electrical Contractors Ltd. will take place on Tuesday, May 26th from 5:00 p.m. to 7:00 p.m. at the Northern Community Centre (556 Goulais Avenue).

Drop in any time during this 'come-and-go' information event, which will provide property owners an opportunity to learn more about the upcoming work and meet the contractor in person to discuss any questions you may have. We look forward to connecting with the community and hope to see you there.
